

THE US LEADER IN BUILDING GCCs

WHAT IS A GCC?

GLOBAL CAPABILITY CENTER

Global Capability Centers, known as GCCs, are the disruptive solution to the traditional outsourcing model. GCCs build talented, cost-effective teams as an extension of your team, a global team.

Unlike other services that build commoditized resource pools, GCCs are effective assets that focus on productivity and add value to your organization. We will customize your solutions to fit your needs in either a BOT, Managed Service or GCC-as-a-service model.

SMC2's approach is built on years of experience leading high-performing global tech teams.
